

How to Destroy License Key on IDParserNode Locked

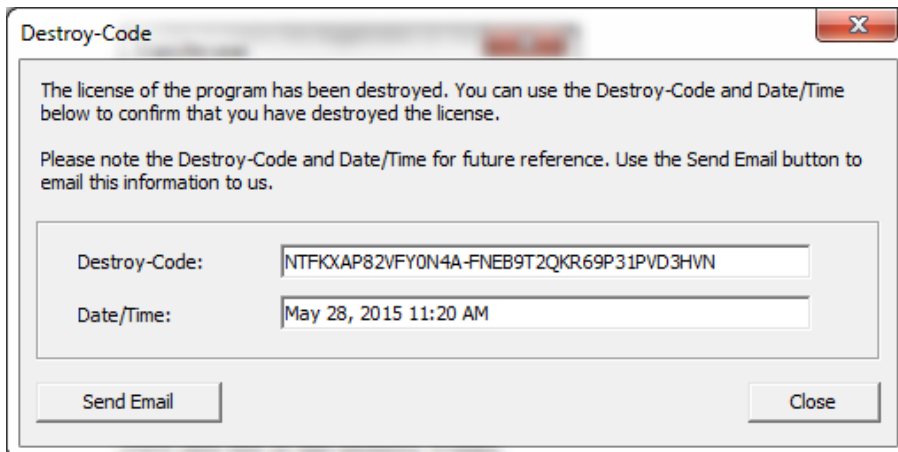

This document describes how to use the key destroy utility by running the utility called: IDParserNodeLock_Destroy.exe

One of the reasons you would want to destroy the key is to allow the license to be transferred to another PC. When you run the destroy utility, you will also create a set of credentials that can be used by TokenWorks to validate the process. Once validated your activation code will be reset and you can install the IDParser Node locked libraries to another PC.

Download the archive and extract the file: IDParserNodeLock_Destroy.exe to a folder on your PC. Run the utility, you will see the following screens:

Click Yes

Copy and paste the Destroy code and the Date/Time fields to a text file or paste them into an e-mail and send it to your contact at TokenWorks.

Note: Clicking the Send Email will attempt to load outlook express, or some other local email client
